Form 801 Section 3.2

Angela Tanghetti's travel related expenses are paid by WECC.

Angela Tanghetti is the California Energy Commission's member of the Anchor Data Set Task Force (ADSTF) and will attend an in-person meeting at the WECC headquarters in Salt Lake City on August 8-9, 2018. The Anchor Data Set (ADS) is intended to be a compilation of load, resource and transmission topology information used by the Regional Planning Groups (RPG) in the Western Interconnection as part of their regional transmission plans. Angela Tanghetti is the Energy Commission's lead on developing the technical characterizations of California's existing and proposed energy policy for use in simulation modeling in support of the Energy Commission's Integrated Energy Policy Report.

The Anchor Data Set (ADS) workshop will focus on the ADS process to date, review areas of ADSTF recommended improvement and to develop consensus around the ADS concept for future cycles. The intent of this ADS workshop is to gain other participants perspective and recommendations to the ADSTF for developing a cohesive view of the 10-year planning horizon in terms of resources and transmission topology.
